Executive Summary

SmartInfoLogiks proposes to develop a **Custom Passport Service Processing & Management Platform for GetQuickPassport** to streamline and digitally manage the complete passport service lifecycle.

The platform will provide a unified, role-based system for **customers, administrators, staff, agents and accounts teams**, covering enquiries, applications, document management, payments, verification, processing, passport form approval, appointments, checklists, communication and reporting.

The solution is proposed to be built on **SmartInfoLogiks’ enterprise application framework, Logiks**, designed to support scalable, secure and workflow-driven business applications, enabling faster development, easier maintenance and future extensibility.

About SmartInfoLogiks

SmartInfoLogiks is an enterprise technology and digital solutions company helping organizations transform complex business processes into connected, intelligent and scalable digital platforms.

We combine **enterprise software engineering, solution delivery, product engineering and technology consulting** to build technology solutions aligned with real business operations and outcomes.

Our capabilities span:

- Enterprise Application Development
- Custom Business Platforms & Workflow Automation
- Digital Transformation
- Product Engineering
- API & System Integration
- Data & Business Intelligence
- Cloud & Technology Solutions
- Application Support & Managed Services

Our approach goes beyond developing individual applications. We focus on creating **connected business ecosystems** that bring processes, people, data and applications together to improve operational visibility, efficiency and customer experience.

For GetQuickPassport, SmartInfoLogiks will leverage this approach to build a centralized **Passport Service Processing & Management Platform** that connects customers, staff, agents and accounts teams through a unified application workflow.

1. Project Overview

SmartInfoLogiks proposes to design and develop a customized **Passport Service Processing & Management Platform** for GetQuickPassport to digitally manage the complete passport service lifecycle, from customer enquiry and application initiation through document verification, payment, processing, passport form review, appointment, checklist and final completion.

The platform will support the seven belowpassport services and provide role-based access for customers, administrators, staff, agents and accounts teams.

The platform will support the following seven services:

1. New Passport
2. Passport Renewal
3. Tatkal Passport
4. Lost Passport
5. Damaged Passport
6. ECR Stamp Renewal
7. PCC

2. Modules Included

1. Customer Dashboard
2. Customer Registration & Login
3. OTP & Mobile Verification
4. Service & Enquiry Management
5. Application Management & Workflow
6. Document Management
7. Passport Form Review & Customer Approval
8. Appointment Management
9. Checklist Management

10. Customer–Staff Inbuilt Chat
11. Admin / Super Admin Panel
12. Staff Panel
13. Agent Panel
14. Accounts Panel
15. Payment Management
16. Transaction Management
17. Email / SMTP Notifications
18. Reports & Analytics
19. Customer / User Management
20. Follow-up Management
21. Service Management
22. Company Management
23. Blog Management
24. Role-Based Access Control
25. Responsive Web Interface
26. API & Database Layer
27. Testing, UAT & Production Deployment

3. Project Timeline

Estimated Duration: 12–16 Weeks

4. Estimated Project Cost

₹13,50,000 + GST

The above is a estimated development and implementation cost for the currently defined scope.

5. Third-Party Integrations & Charges

Third-party integration development, wherever required within the defined scope, is included.

However, **third-party service charges will be additional and payable at actuals**, including:

- OTP/SMS provider charges
- Payment Gateway transaction/MDR charges
- SMTP/Email service charges, if applicable
- Any paid third-party API/service charges
- Any future external API subscription or usage charges

6. Hosting & Infrastructure

Hosting and cloud infrastructure charges will be additional and billed at actuals.

The application can be deployed on AWS or another mutually agreed cloud infrastructure.

Hosting cost will depend on:

- Server configuration
- Storage requirements
- Document volume
- Traffic
- Database requirements
- Backup requirements

7. Change Requests

Any **new functionality, modification to approved workflows, additional integrations, major UI/UX changes or changes in business requirements** after requirement sign-off will be treated as a **Change Request (CR)**.

Such changes will be evaluated separately and may have an additional cost and impact on the project timeline.

8. Warranty & Support

SmartInfoLogiks will provide **3 months warranty support from the date of production go-live**.

Warranty support will cover:

- Bugs in delivered functionality
- Functional defects
- Issues directly related to the approved development scope
- Technical stabilization of the delivered application

Warranty does not include new features, enhancements, new integrations or changes in business requirements.

9. Annual Maintenance & Support (AMC)

After the completion of the warranty period, AMC will start.

AMC:

20% Of project Value +GST

Note: This document is the property of SmartinfoLogiks . Unless otherwise specified, no part of this document may be reproduced or utilized in any form or any means, electronic or mechanical, including photocopying and microfilm, without written permission from SmartinfoLogiks.

AMC will cover application maintenance, bug fixing, technical support and minor configuration changes within mutually agreed limits.

Major enhancements, new modules, new integrations and significant architectural changes will be quoted separately.

10. Assumptions & Exclusions

Assumptions

- Requirements will be finalized and approved before development of respective modules.
- Client will provide required business rules, service information, content, checklist information and other required inputs in a timely manner.
- Client will provide required credentials/access for third-party services.
- Payment gateway merchant onboarding and approval will be managed by the client.
- OTP/SMS, payment gateway, SMTP and other third-party services will be procured by the client.
- The application will be developed as a responsive web application.
- Timely feedback, approvals and UAT participation from the client will be required to maintain the proposed timeline.
- Any third-party service limitations or policy changes may impact functionality or timeline.

Exclusions from costing

The cost mentioned are excluding below modules :

- 1. Detailed Invoice Management**
- 2. WhatsApp Bot Integration**

3. Campaign Management

4. Coupon Management

Other exclusions:

- Native Android/iOS mobile applications
- Government portal/API integration
- Government website automation or scraping
- Bulk legacy data migration
- AI/ML-based functionality
- ERP/accounting software integration
- Hardware integration
- Any functionality not specifically included in the approved scope

11. Commercial Summary

Particular	Details
Project	Custom Passport Service Processing & Management Platform
Technology	React.js + Node + MySQL + REST API
Development & Implementation	₹13,50,000 + GST
Estimated Timeline	12–16 Weeks
Warranty Support	3 Months
AMC	20% Of project Value +GST
Hosting / Cloud Infrastructure	At Actuals
Third-Party Service Charges	At Actuals
Change Requests	Charged Separately
WhatsApp Bot	Excluded
Campaign Management	Excluded
Coupon Management	Excluded
Detailed Invoice Management	Excluded

12. Payment Terms

Milestone	Payment
Project Initiation	30%
UI/UX & Architecture Sign-off	20%
Core Platform & Major Modules Completion	20%
UAT Build / Feature Completion	20%
Production Deployment & Go-Live	10%

13. Quotation Validity

This quotation is valid for **30 days** from the date of submission.

Any revision in scope or commercial requirements during the validity period may require a revised quotation.

14. Acceptance

Acceptance of this proposal confirms the commercial direction and authorises the parties to proceed toward finalisation of the Statement of Work and project commencement documentation.
